Today's academic environment presents assessment challenges defined by an increased volume of available information coupled with increased competition among students and time constraints. Multiple-choice questions (MCQs) provide examiners with an opportunity to assess academic performance on the basis of instant recollection of correct answers in a minimal amount of time. MCQs Series for Life Sciences, Volume 2 is a collection of MCQs on advanced topics and offers the following benefits for readers:

- o includes over 950 relevant MCQs
- o covers two major topics: cell culture and microbiology
- o simplified language and presentation of concepts
- o answers to each question are provided

This MCQ book series in life sciences is a handy reference for graduate and postgraduate students undertaking examinations or entrance tests, as well as teachers or examiners involved in setting and controlling assessments in specific subjects in life sciences.

New and expanded for its second edition, *Environmental Microbiology: From Genomes to Biogeochemistry*, Second Edition, is a timely update to a classic text filled with ideas, connections, and concepts that advance an in-depth understanding of this growing segment of microbiology. Core principles are highlighted with an emphasis on the logic of the science and new methods-driven discoveries. Numerous up-to-date examples and applications boxes provide tangible reinforcement of material covered. Study questions at the end of each chapter require students to utilize analytical and quantitative approaches to define and defend arguments and to apply microbiological paradigms to their personal interests. Essay assignments and related readings stimulate student inquiry and serve as focal points for teachers to launch classroom discussions. A companion website with downloadable artwork and answers to study questions is also available.
